

ASSIGNMENT 4

Ultrasonic sensor simulation in Wokwi

Date	14 November 2022
Team ID	PNT2022TMID29912

Question-1:

Write a code and connections in wokwi for the ultrasonic sensor. Whenever the distance is less than 100cms send an "Alert" to IBM cloud and display in the device recent events.

Code:

```
#include <WiFi.h> #include <PubSubClient.h> void
callback(char* subscribetopic, byte* payload, unsigned int
payloadLength);
//-----credentials of IBM Accounts-----
#define ORG "kotoq5"//IBM ORGANITION ID
#define DEVICE_TYPE "ESP32"//Device type mentioned in ibm watson IOT Platform #define
DEVICE_ID "12345"//Device ID mentioned in ibm watson IOT Platform #define TOKEN "12345678"
//Token
String      data3;      char      server[]      =      ORG
".messaging.internetofthings.ibmcloud.com"; char publishTopic[] =
"iot-2/evt/Data/fmt/json";
char subscribetopic[] = "iot-2/cmd/test/fmt/String"; char authMethod[]
= "use-token-auth";
```

```

char token[] = TOKEN;
char clientId[] = "d:" ORG ":" DEVICE_TYPE ":" DEVICE_ID;
WiFiClient wifiClient;
PubSubClient client(server, 1883, callback, wifiClient); const int trigPin =
5; const int echoPin = 18; #define SOUND_SPEED 0.034 long duration;
float distance; void setup() { Serial.begin(115200); pinMode(trigPin,
OUTPUT); pinMode(echoPin, INPUT); wificonnect(); mqttconnect();
}
void loop()
{
digitalWrite(trigPin, LOW);
delayMicroseconds(2);
digitalWrite(trigPin, HIGH);
delayMicroseconds(10);
digitalWrite(trigPin, LOW); duration =
pulseIn(echoPin, HIGH); distance =
duration * SOUND_SPEED/2;
Serial.print("Distance (cm): ");
Serial.println(distance); if(distance<100)
{
Serial.println("ALERT!!");
delay(1000); PublishData(distance);
delay(1000);
if (!client.loop())
{ mqttconnect();
}
}
delay(1000);
}
void PublishData(float dist)
{ mqttconnect();

```

```

String payload = "{\\Distance\\":\""; payload
+= dist;
payload += "\",\\ALERT!!\\\":\\\"\\\"Distance less than 100cms\\\"\\\""; payload +=
}\"";
Serial.print("Sending payload: ");
Serial.println(payload);

if (client.publish(publishTopic, (char*) payload.c_str())) {
    Serial.println("Publish ok");
} else {
    Serial.println("Publish failed");
}
}

void mqttconnect() { if (!client.connected()) {
    Serial.print("Reconnecting client to "); Serial.println(server); while
    (!client.connect(clientId, authMethod, token)) {Serial .print(".");
    delay(500);
}
    initManagedDevice();
    Serial.println();
}
}

void wificonnect()
{
    Serial.println(); Serial.print("Connecting to ");
    WiFi.begin("Wokwi-GUEST", "", 6); while
    (WiFi.status() != WL_CONNECTED) { delay(500);
    Serial.print(".");
}
}

```

```

Serial.println(""); Serial.println("WiFi connected");
Serial.println("IP address: ");
Serial.println(WiFi.localIP());
}
void initManagedDevice() { if
(client.subscribe(subscribetopic))
{ Serial.println(subscribetopic); Serial.println("subscribe to cmd
OK");
} else {
Serial.println("subscribe to cmd FAILED");
}
}
void callback(char* subscribetopic, byte* payload, unsigned int payloadLength)
{
Serial.print("callback invoked for topic: ");
Serial.println(subscribetopic); for (int i =
0; i < payloadLength; i++) {
//Serial.print((char)payload[i]); data3 +=
(char)payload[i];
}
Serial.println("data: "+ data3); data3="";
}

```

Circuit Diagram:

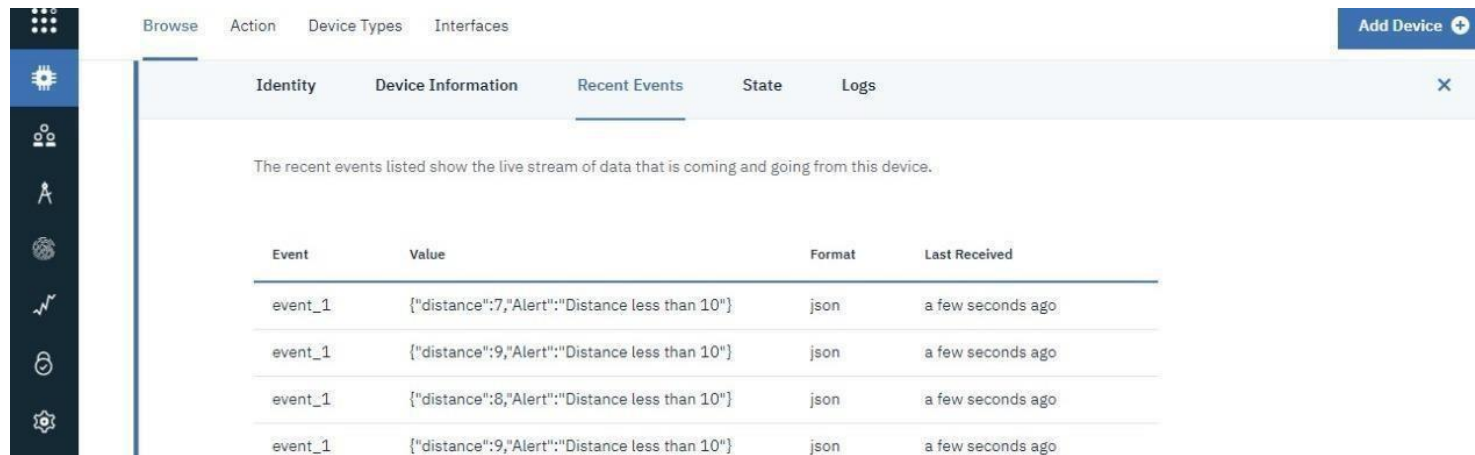

Output:

Wokwi output:

```
Connecting to ....
WiFi connected
IP address:
10.10.0.2
Reconnecting client to ytluse.messaging.internetofthings.ibmcloud.com
iot-2/cmd/test/fmt/String
subscribe to cmd OK

Distance (cm): 399.92
Distance (cm): 399.96
Distance (cm): 399.94
Distance (cm): 399.98
Distance (cm): 399.94
Distance (cm): 399.92
Distance (cm): 399.94
```

IBM cloud output:

The screenshot shows the IBM IoT Cloud interface. On the left is a dark sidebar with icons for home, devices, alerts, maps, and settings. The main area has a top navigation bar with 'Browse', 'Action', 'Device Types', and 'Interfaces'. A 'Add Device' button is in the top right. Below the navigation bar are tabs for 'Identity', 'Device Information', 'Recent Events', 'State', and 'Logs'. The 'Recent Events' tab is selected, showing a message: 'The recent events listed show the live stream of data that is coming and going from this device.' Below this is a table with four columns: 'Event', 'Value', 'Format', and 'Last Received'. The table contains four rows of event data.

Event	Value	Format	Last Received
event_1	{"distance":7,"Alert!":"Distance less than 10"}	json	a few seconds ago
event_1	{"distance":9,"Alert!":"Distance less than 10"}	json	a few seconds ago
event_1	{"distance":8,"Alert!":"Distance less than 10"}	json	a few seconds ago
event_1	{"distance":9,"Alert!":"Distance less than 10"}	json	a few seconds ago
